Established on 20<sup>th</sup> June 1887, Raja Peary Mohan College is a Philanthropic Institution, established by Babu Joy Krishna Mukherjee, the then Zamindar and Social reformist of Uttarpara in the district of Hooghly in West Bengal. The Institution, Initially Known as Uttarpara College, was later moved forward by his able son Raja Peary Mohan Mukherjee, after whom the college was later renamed. It is a Multi-Faculty College with science Arts and Commerce Faculty, affiliated under the University of Calcutta. It has been accredited B++ by NAAC in 2005 and the Internal Quality Assurance Cell of the college is making all sorts of necessary preparation for the Re-accreditation process. The Letter of Intent(LOI) has already been sent to NAAC and IQAC will soon submit the Re-accreditation Assessment Report (RAR).

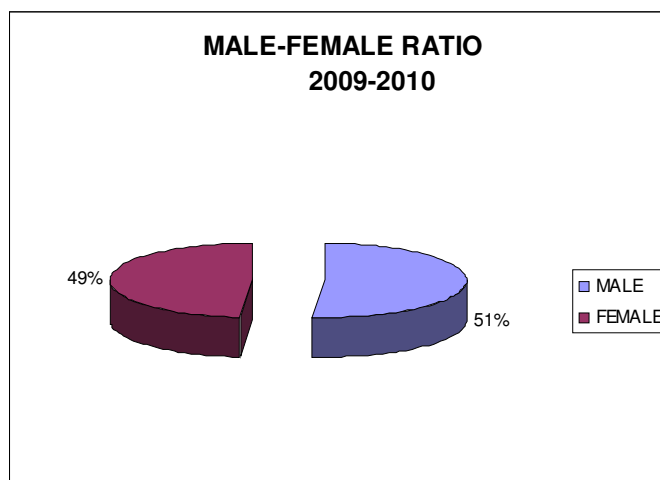

Situated at the junction of three districts of West Bengal— Howrah, North 24 Parganas (Minority Concentrated backward district) and Hooghly (Educationally Backward District) Raja Peary Mohan College caters to different section of students from different social and economic background. Moreover the institution caters to almost 50% girls students every year. Majority of the students come from hinter lands and many of them are first generation learners. The poor economic background of many students and the schools from which they come did not gave them the opportunity to study in a modern, advanced, effective and appropriate methods of teaching and learning equipments or teaching aids required.

## ECONOMIC BCKGROUND:

**Economically Backward:** At present according to the government of West Bengal Available data of 2005 & 2006 there are about 22% people who live below the poverty line in the Hooghly District where Raja Peary Mohan College is located. Many students who are enrolled in this college come from a background where the family income is below Rs 5000 per month. The data, which are gathered, is from the information that the students give in the admission form during the time of their admission. But we do not have any data regarding students who hold BPL Card. Every year the college authority receives about 300 to 350 applications from the admitted students to waive their college tuition fees whose family income is below Rs 2000/- to Rs 3000/- per month. They even earn themselves by working at nightshift or giving tuitions to other small children. The college authority after verifying the applications with the help of students union and teaching and non-teaching staff waive about 70-100 (Ist, IInd & IIIrd year) students tuition fees of the Students of the B A,, B Sc and B.COM Stream on merit-cum-means basis from their own limited internal resources.

The main objective and goal of the college is to students to give them the exposure to a modern, well-equipped and appropriate teaching and learning facilities in the under graduate level so that they can build up their carrier on a solid academic base. Moreover the University of Calcutta has introduced a completely new syllabus for the under graduate studies for all subjects from this academic year i.e. 2010-2011. For this the college needs assistance from UGC to:

1. The Proposal principally covers the equipments for the laboratory based subjects taught in our college at the under graduate level whose pressing needs could not be addressed in the XI plan proposals (ref no.- -- dated ) with respect to our demands, eliciting the requirements, placed in 2009, due to the ceiling mechanism designed by you. To Develop the Laboratory facilities of the five existing Laboratory based Science departments---Physics, Chemistry, Botany , Physiology and Zoology for proper arrangements of instruments required the practical classes and also visual teaching aids to make teaching and learning more effective . Moreover new equipments are required for new syllabus introduced from the Academic year 2010- 11 for the Honours and General course. Moreover, though there was no sub-ceiling against Equipments the aggregate amount was not been exhausted in the Proposal placed while eliciting the demands for requirement for Laboratory equipments of the laboratory based subjects since the exhaustion of the Ceiling Amount of Rs.19.00 Lakhs against items under the Basic Developmental grant for our college, here would have meant that for the remaining items under the Section would not have been allocated. As no alternative mode of financing is possible for these items this was decided against, as they are not of any lesser importance to the College.

2. Assistance is also required for the development of the ICT Facilities for the Computer laboratory based subjects like Mathematics and Commerce according to the new introduced syllabus from 2010-2011.
3. Computers, software & visual teaching aids for setting up a CENTAL COMPUTING LABORATORY for all so that they have a knowledge of basic computer operations, internet browsing so as to make teaching and learning more effective in today's ICT based education and make prepared to face their future carrier.
4. Reprographic Facility for the Library is required so the students can photocopy rare and single copy books and journals present in the library of the college.
5. The College has already started the process of the library automation and has installed LAN. All the departments ,Library and the Office is now connected by LAN through a High End Server for smooth dissemination of information and also for internet facilities. Very soon the INBLIBNET connection in the Library and subscription of e Journals will also be an integral part of the institution which will definitely help both the students and teachers and improve the academic practices of the institution. But for smooth operation of this LAN system some Server Based Anti-Virus software and some Operating Software are required. For this the college need the help of UGC as they are costly and is not possible for the college to meet up the finance single handedly.

## **Justification for the Requirements of Laboratory and Teaching Aids Equipments for Laboratory based subjects**

- New equipments are required for new syllabus introduced from the Academic year 2010- 11 for the Honours and General course.
- The proposal principally covers the equipments for the laboratory based subjects taught in our college at the under graduate level whose pressing needs could not be addressed in the XI plan proposals (ref no.--- dated ) with respect to our demands, eliciting the requirements, placed in 2009, due to the ceiling mechanism designed by you. Though there has been no sub-ceiling against Equipments the aggregate amount was not been exhausted in the Proposal placed while eliciting the demands for requirement for Laboratory equipments of the laboratory based subjects since the exhaustion of the Ceiling Amount of Rs.19.00 Lakhs against items under the Basic Developmental grant for our college, here would have meant that for the remaining items under the Section would not have been allocated. As no alternative mode of financing is possible for these items this was decided against, as they are not of any lesser importance to the College.
- Escalation prices of equipments make it different for the college to purchase or replace equipments from its own funds.

Additional Grant Sought for EQUIPMENTS/TEACHING AIDS is: **Rs. 5,00,000/-**(Rupees Five Lakh s only)

**Justification for the Items Required:**

**For item (1): Desktop computers are required to improve computation facility in the departmental lab of Mathematics and Commerce where under curriculum exposure to computer education is of high priority. Also presently the central computer lab, used by**

students of various departments, is not having enough computers. So to enhance the computing facility the college urgently requires those computers.

For items (2), (3) & (4): In modern day education teaching with the help of audio-visual medium is very popular among students. So it is becoming a necessity to build a modern day classroom with multimedia facility.

For item (5): It is required to improve and enhance the local area network (LAN) already present in the college.

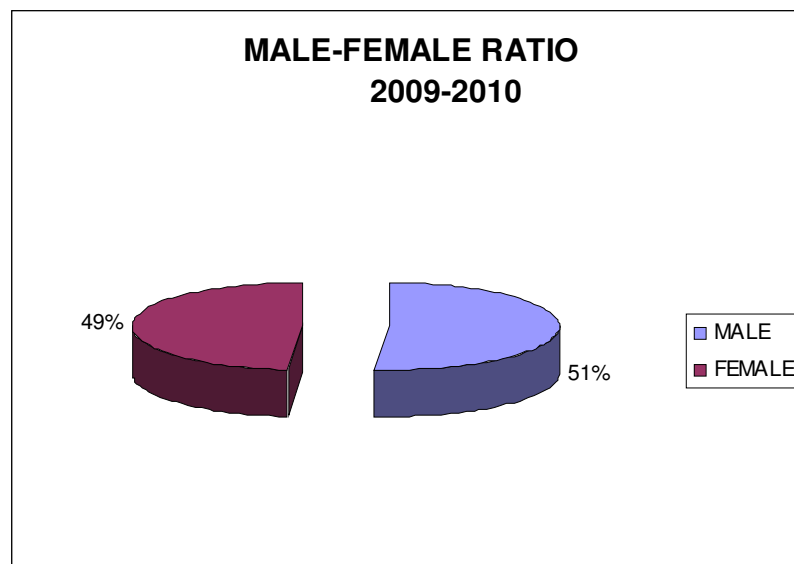

### Justification for the Requirements

1. Computers, software & visual teaching aids for **setting up a CENTAL COMPUTING LABORATORY** for all Students of the College so that they can have a knowledge of basic computer operations, internet browsing so as to make teaching and learning more effective in today's ICT based education and make prepared to face their future carrier.

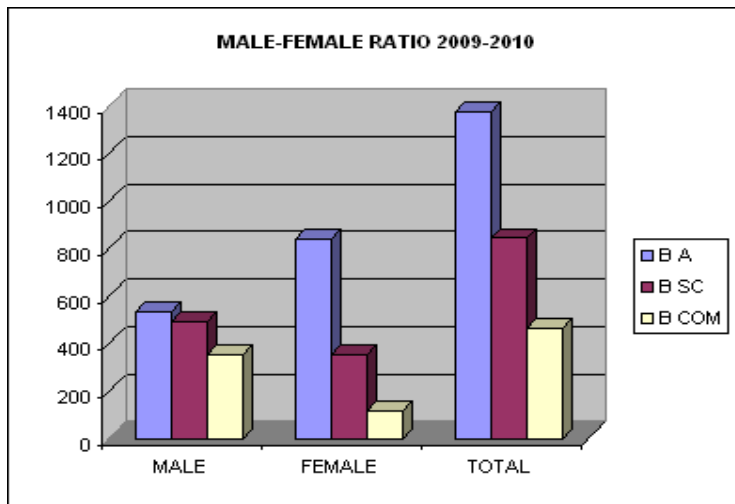

2. Moreover most of the Students Come from a very **poor social and economic background and to get basic ICT knowledge with money from private institute becomes impossible** for them. If a common computer laboratory is set up then these students will be immensely befitted.

## ECONOMIC BCKGROUND:

**Economically Backward:** At present according to the government of West Bengal Available data of 2005 & 2006 there are about 22% people who live below the poverty line in the Hooghly District where Raja Peary Mohan College is located. Many students who are enrolled in this college come from a background where the family income is below Rs 5000 per month. The data, which are gathered, is from the information that the students give in the admission form during the time of their admission. But we do not have any data regarding students who hold BPL Card. Every year the college authority receives about 300 to 350 applications from the admitted students to waive their college tuition fees whose family income is below Rs 2000/- to Rs 3000/- per month. They even earn themselves by working at nightshift or giving tuitions to other small children. The college authority after verifying the applications with the help of students union and teaching and non-teaching staff waive about 70-100 (Ist, IInd & IIIrd year) students tuition fees of the Students of the B A,, B Sc and B.COM Stream on merit-cum-means basis from their own limited internal resources.
