

## **ACADEMIC AUDIT FOR THE SESSION 2005-2006**

### **HISTORY**

**Raja Peary Mohan College**, Uttarpara, was founded on 20<sup>th</sup> June 1887, by Late **Joykrishna Mukherjee**, one of the pioneers in educational and cultural movements and social reforms in 19<sup>th</sup> country Bengal. At the time of foundation, the College was named Uttarpara College. Eight years later, Late Raja Peary Mohan Mukherjee, son and successor of Joykrishna Mukherjee maintained the College as a non-government Institution. **Raja Peary Mohan Mukherjee was the first M.A. from Calcutta University.** In 1953, the College was renamed as **Raja Peary Mohan College**, Uttarpara in gratitude to Raja Peary Mohan Mukherjee, the patron and benefactor of the College, who served as the crisis-manager when the College had run into a very rough weather.

### **AMBIENCE**

Since the date of its foundation, the College slowly and steadily transcended its local boundary and grew into a very large educational institution catering to the academic needs of boys and girls coming from its vast hinterland. The College draws a large no. of students from the Districts of Hooghly, Howrah and North 24-Parganas, including North Kolkata. It has now developed itself as a prominent center of learning and as one of the biggest Colleges in West Bengal under Calcutta University. In 1956, from Intermediate standard, the College was upgraded to a Degree College with affiliation in degrees of Arts and Science. Two years later, it got its affiliation in Commerce faculty, at the Pass level and in 1970 at the Honours level. Till 1990, the College had been offering Honours Courses in Bengali, Political Science, Philosophy, Physics, Chemistry, Mathematics, Economics and Zoology. In 1990, the College got permission to provide Honours course in Physiology, and in 1997 in English and in Botany. Raja Peary Mohan College Computer Centre was inaugurated on 8<sup>th</sup> July 1994 by the Hon'ble State Education Minister, Prof. Satyasadhan Chakraborty. **The college has been accredited B++ by NAAC in September 2005**

### **LOCATION**

The College has a beautiful overview of the **Hooghly River**, the **Dakshineswar Kali Temple** and of the **Vivekananda Setu**, more commonly known as **Bally Bridge**. It is located on a point

near the G.T.Road, and is within easy reach of Bally Ghat Railway Station and Bally station on Chord line as well as Howrah-Bandel and Tarakeswar Main line. The College is well connected by both railway and bus routes with all parts of the districts of Kolkata, Hooghly, Howrah and North 24 Parganas. Thus the location of the College is ideally suited for catering to the educational needs of the students from distant urban and rural areas.

## PROJECTS

### **RESEARCH PROJECTS:**

One of the research projects titled "*A Study on the Variability of Total Electron Content near the Crest of the Equatorial Anomaly in the Indian Ocean*" has been sanctioned by the **INDIAN SPACE RESEARCH ORGANISATION (ISRO), Department of Space, Government of India, under RESPOND Program for financial assistance.** Total approved grant for the Project is Rs.6.96 lakhs. The Principal Investigator of the said Project is **Dr. Shyamal Kumar Chakraborty, Department of Physics.** The start date for the Project is 12<sup>th</sup> January, 2006. One Junior Research Fellow named Rajkumar Hajra, M.Sc. in Physics, has been appointed for this project.

The project is primarily based on variability study of Ionospheric Total Electron Content (TEC) which is one of the important parameters in Space Weather problem. TEC has been measured by Faraday rotation technique using trans-ionospheric signal from the geostationary satellite ETS II. The data were recorded at the Ionospheric Field Station, Haringhata (22.48° N) of the University of Calcutta. Field station, being situated virtually below the northern crest of the Equatorial Anomaly, is an excellent platform for studying Equatorial Phenomena. A long term (1979-90) TEC data base along with solar wind velocity/magnetic and wind data will be utilized for the present analysis. Unique feature of the data base is that it covers the increasing phase (1986-90) as well as decreasing phase (1979-85) of solar activity. Extensive study will be made on the variability of TEC, both qualitatively and quantitatively, on various geophysical parameters. The study will be useful in understanding the ionospheric group delay of trans-ionospheric signal as used in GPS and other systems.
